PAUL MITCHELL

Health and Safety Data Product List

This list should be used with the booklet 'A Guide to Health & Safety of Salon Hair Products' to provide the information required for COSHH assessments to be carried out on salon hair products. It is divided into potentially Hazardous and Non-Hazardous Products. For hazardous products it includes the relevant Product Category Number to refer to in the booklet.

The latest edition of the guide is the 8th edition and was issued in January 2007. Copies of the Guide to Health & Safety of Salon Hair Products can be obtained from Salon Success Limited on 01296 390500 or the Hairdressing & Beauty Suppliers Association <http://www.hbsa.uk.com/coshh.html>

IMPORTANT

Some products are considered to be 'non-hazardous' and others are considered to contain ingredients, which are classified as 'hazardous'. To assist you in the proper handling of these products we have two lists one for non-hazardous and one for hazardous products. The **HAZARDOUS PRODUCT** list has the name of the product and the relevant product category in the booklet "A Guide to the Health and Safety of Salon Hair Products"

OXIDATIVE HAIR COLORING PRODUCTS

REMEMBER:

A skin allergy test must be performed 48 hours before each product use, even on clients who have used colouring products before.

Contains ingredients that may cause skin irritation/allergic reaction on certain individuals that in rare instances can be severe. To reduce allergy risk read and follow the instructions prior to use.

Do **NOT** use on clients who have previously experienced a reaction to a hair colorant or a sensitive, itchy or damaged scalp.

Hair colorants are not intended for use on persons under the age of 16

Tattoos, including black and temporary henna, may increase the risk of allergy.
